

KANEKA Q10™ (Coenzyme Q10)

Safety, Reliability and High Quality

Due to the recent series of harmful incidents involving adulterated Chinese ingredients which made their way into pet foods and drugs in North and South America, Kaneka Nutrients L.P. would like to assure it's customers about the purity, safety and reliability of **KANEKA Q10™**.

CoQ10 is one of the most studied, safe and effective products in the dietary supplement industry, and Kaneka has been the leader and driving force behind this effort.

The Facts

1. **KANEKA Q10™** is manufactured in Takasago, Japan and Pasadena, Texas – the first and only US production facility for CoQ10. International Food and Pharmaceutical GMP's are strictly adhered to at both locations.
2. **KANEKA Q10™** is the world's only yeast fermented CoQ10. It is the recognized industry standard, with the highest purity, and it is the most bio-identical to what humans produce *in vivo*. Other major producers of CoQ10 utilize bacterial fermentation or chemical synthesis of solanesol from tobacco.
3. **KANEKA Q10™** has been manufacturing CoQ10 since 1977 and has the world's largest capacity.
4. **KANEKA Q10™** has been proven to be safe in dozens of animal and human safety studies, with clinical doses up to 3,000 mg per day. None of the studies showed any adverse effects.

*Shults et al., 2004 Exp. Neurol 188, 491-494
*Ferrante et al., 2005 Neurology 65, 1834-1836
5. **KANEKA Q10™** is currently the world's only Self-Affirmed GRAS (Generally Recognized As Safe - for use in foods) CoQ10, because it alone has supporting safety studies.

*Ikematsu et al., 2006 Regul. Toxicol. Pharmacol. 44, 212-218
6. **KANEKA Q10™** has been used in the vast majority of clinical trials over the past three decades, including FDA approved studies and National Institutes of Health (NIH) funded ones.

Researched by Kaneka as of May, 2007
